Description

Description

Through legislative appropriation, the Iowa Governor's STEM Advisory Council is able to offer exemplary STEM programs throughout the state. The STEM Scale-Up Program has demonstrated success in increasing student interest and achievement in STEM across all demographics. Three programs, one each in science, technology and mathematics/engineering, have been selected to be offered on the 2026-27 STEM Scale-Up Program menu. These programs bring high-quality STEM education offerings to schools, after school programs and other settings for grades PK-12. Each went through a rigorous review process, demonstrating an appeal to diverse youth, success in improving academic performance, evidence of integrating STEM concepts, development of school-business-community partnerships and sustainability beyond STEM Council financial support.
